Project Overview

This project automates the Placement Management System using Salesforce Flow Builder and Validation Rules.

The project includes:

- Student Management
 - Job Management
 - Application Management
 - Offer Letter Management
 - Record Triggered Flows
 - Validation Rules
 - Email Notifications
-

Requirements Solved Using Flow

Flow 1 – Application Date Auto Fill

- Object: Application
- Trigger: Record Created

- Type: Before Save
 - Purpose: Automatically populates the Application Date.
-

Flow 2 – Email Notification

- Object: Application
 - Trigger: Record Created
 - Type: After Save
 - Purpose: Sends an email notification to the Placement Officer.
-

Flow 3 – Offer Letter Creation

- Object: Application
 - Trigger: Record Updated (Status = Selected)
 - Type: After Save
 - Purpose: Automatically creates an Offer Letter record.
-

Requirements Solved Using Validation Rules

Validation Rule 1

Student CGPA must be greater than or equal to the Job Minimum CGPA.

Formula:

`Student__r.CGPA__c < Job__r.Minimum_CGPA__c`

Validation Rule 2

Application Date cannot be after the Job Closing Date.

Formula:

`Application_Date__c > Job__r.Closing_Date__`

Validation Rule 3

Mandatory fields cannot be left blank.

Formula:

```
OR(  
ISBLANK(Student__c),  
ISBLANK(Job__c)  
)
```

Design Challenge :

Requirement	Validation Rule	Flow	Trigger	Why?
Reject duplicate applications	✗	✗	✓	Trigger can check existing Application records and prevent duplicate applications before saving. <i>(Note: In real Salesforce, Duplicate Rules can also be used.)</i>
Auto-fill Application Date	✗	✓	✗	A Before-Save Record-Triggered Flow automatically sets the Application Date when a new Application is created.
Send Email	✗	✓	✗	An After-Save Record-Triggered Flow sends an email notification to the Placement Officer after a new Application is created.
Reject low CGPA	✓	✗	✗	A Validation Rule prevents saving the Application if the student's CGPA is lower than the Job's minimum CGPA

Create Offer Letter record	✗	✓	✗	An After-Save Record-Triggered Flow automatically creates an Offer Letter record when the Application Status changes to Selected .
----------------------------	---	---	---	--

Why These Solutions Were Chosen

Flow

Flow is a declarative (no-code) automation tool. It is easy to build, maintain, and supports field updates, email notifications, and related record creation.

Validation Rules: Validation Rules ensure data quality by preventing invalid records from being saved.

Apex:

The screenshot shows the 'New Application' form in Salesforce. The form has a title bar 'New Application' and a sub-header 'Information'. Below this, there are several fields: 'Application Name' (with a dropdown arrow), 'Student' (with a dropdown arrow and a green checkmark icon), 'Job' (with a dropdown arrow and a red 'x' icon), 'Application Date' (with a dropdown arrow and a date value of 30/07/2026), and 'Status' (with a dropdown arrow and a value of 'Applied'). A red error message box is displayed over the form, stating 'We hit a snag.' and 'Review the errors on this page.' Below the message, it says 'Student CGPA is below the minimum requirement for this job.' At the bottom of the form, there are buttons for 'Cancel', 'Save & New', and 'Save'.

New Application

Information * - Required Information

Application Name

Student nasee

Job sales developer

Application Date 06/08/2026

Status Applied

Owner SHAIK NASEEMA

We hit a snag.

Review the errors on this page.

- This student has already applied for this job.

Cancel Save & New Save

Successful Execution

#SS-Records

#SS-Validation-rules

#SS-Action(send email)

#SS-Assignment(set application date)

#SS-Create Record(offer letter)

#SS-Offer Letter

#SS-email

#SS-Application date (auto updated)

Object Manager

Label	API Name	Type	Description	Last Modified	Deployed
Student	Student__c	Custom Object		30/07/2026	✓
Application	Application__c	Custom Object		30/07/2026	✓
Offer Letter	Offer_Letter__c	Custom Object		30/07/2026	✓
Job	Job__c	Custom Object		30/07/2026	✓
prescription	prescription__c	Custom Object		28/07/2026	✓
Appointment	Appointment__c	Custom Object		28/07/2026	✓
Doctor	Doctor__c	Custom Object		28/07/2026	✓
Patient	Patient__c	Custom Object		28/07/2026	✓
Work Step Template	WorkStepTemplate	Standard Object			

Validation Rules

Rule Name	Error Location	Error Message	Active	Modified By
Check_Application_Date	Top of Page	Application Date cannot be after the Job Closing Date.	✓	RAJULAPUDI SANDHYA, 30/07/2026, 1:24 pm
Check_Student_CGPA	Top of Page	Student CGPA is below the minimum required CGPA.	✓	RAJULAPUDI SANDHYA, 30/07/2026, 12:31 pm
Mandatory_Fields	Top of Page	Student and Job fields are mandatory.	✓	RAJULAPUDI SANDHYA, 30/07/2026, 1:25 pm

Developer Edition

Flow Builder Application Email Notification - V1

Last saved on 30/7/2026, 12:18 pm

Send Email

Label: Send Email to Placement Officer

API Name: Send_Email_to_Placement_Officer

Description:

Use values from earlier in the flow to set the inputs for the "Send Email" core action. To use its outputs later in the flow, click them in variables.

Set Input Values

Configure Recipient Details

Recipient Address: Enter value or search resources... (Send_Email_to_Placement_Officer)

CC Address: Enter value or search resources...

BCC Address: Enter value or search resources...

Configure Sender Details

Sender Type:

Record-Triggered Flow

Start

Object: Application

Trigger: A record is created

Optimize for Actions and Related Records

+ Add Scheduled Paths (Optional)

+ Open Flow Trigger Explorer for Applications

Run Immediately

Send Email to Placement Officer

End

Developer Edition

Flow Builder Application Date Auto Fill - V2

Last saved on 30/7/2026, 12:04 pm

Assignment

Label: Set Application Date

API Name: Set_Application_Date

Description:

Set Variable Values

Each variable is modified by the operator and value combination.

Variable	Operator	Value
..application__c > Application Date X	Equals	..ing Flow Interview > CurrentDate X

+ Add Assignment

Record-Triggered Flow

Start

Object: Application

Trigger: A record is created

Optimize for Fast Field Updates

+ Open Flow Trigger Explorer for Applications

Set Application Date

Assignment

End

Developer Edition

Flow Builder Offer Letter Creation - V1

Last saved on 30/7/2026, 01:37 pm

Create Records

Label: Create Offer Letter

API Name: Create_Offer_Letter

Description:

How to set record field values

Manually

Create a Record of This Object

Object: Offer Letter

Set Field Values for the Offer Letter

Field	Value
Student X	Triggering Application__c > Student X
Job X	Triggering Application__c > Job X
Offer Date X	Triggering Application__c > Application Date X

+ Add Field

Manually assign variables (advanced)

Check for Matching Records

Record-Triggered Flow

Start

Object: Application

Trigger: A record is updated

Conditions: 1

Optimize for Actions and Related Records

+ Add Scheduled Paths (Optional)

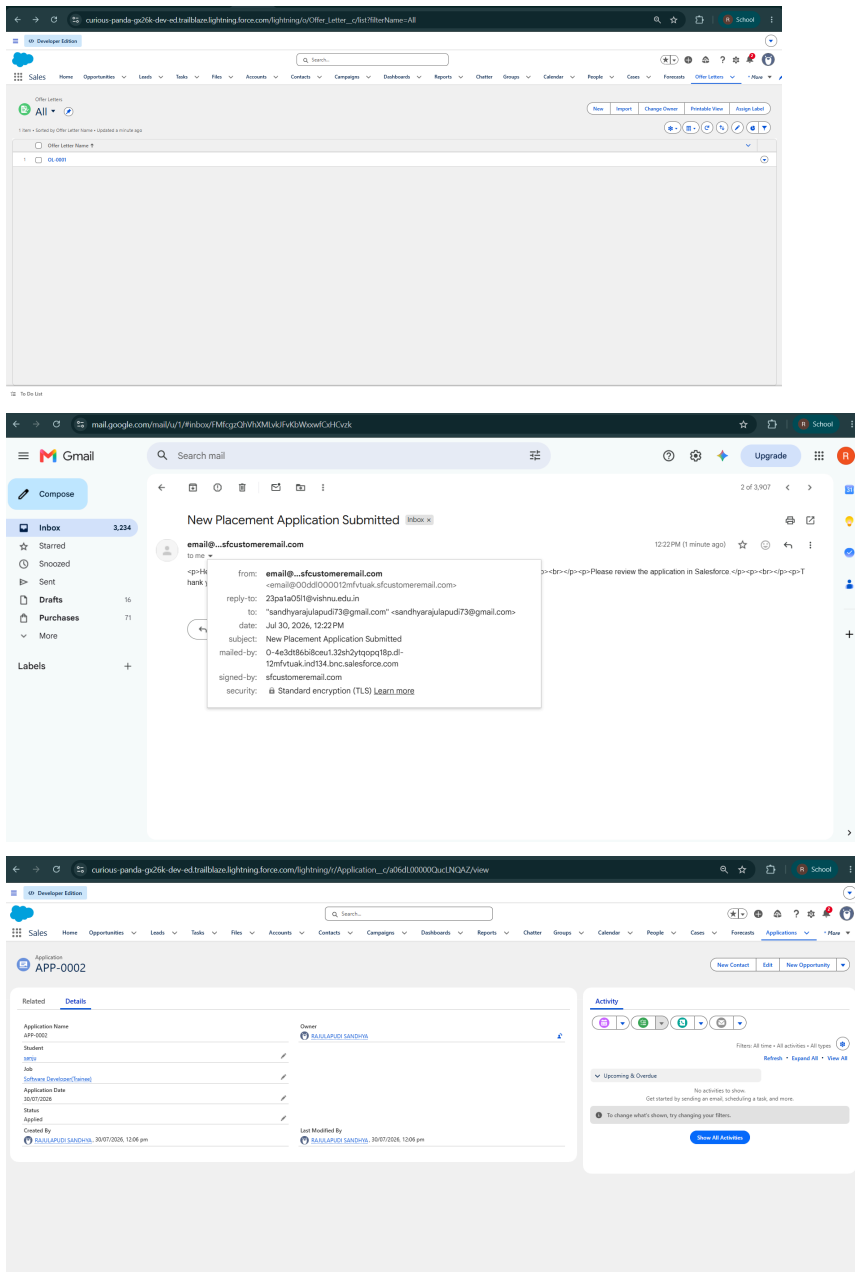

+ Open Flow Trigger Explorer for Applications

Run Immediately

Create Offer Letter

Create Records

End

Conclusion

The Placement Management System was successfully developed using Salesforce Flow Builder and Validation Rules. The project automates application processing, validates data quality, sends email notifications, and generates Offer Letter records.
